PROFESSIONAL SUMMARY

iOS Developer with 2+ years of experience at Accenture, building connected-car apps for a leading automotive client, used by 50k+ daily active users. Shipped 7+ customer-facing features with Swift, SwiftUI, and VIPER architecture. Strong in reusable UI components, REST API integration, and Figma-to-code collaboration.

WORK EXPERIENCE

Packaged App Development Associate (iOS App Developer) | Accenture Feb 2024 – Present | Bengaluru
Leading automotive client | Connected-car iOS applications

- Developed **7+ customer-facing features** for connected-car iOS apps using **Swift, SwiftUI, and VIPER architecture**, including:
- Remote start & lock** – enabled customers to start and lock their vehicle remotely from the app.
- Vehicle diagnostics** – built screens that surface vehicle health information to customers.
- EV charging status & maintenance alerts** – gave customers visibility into charging status and timely service alerts.
- Contributed to apps serving **50k+ daily active users**, rated **4.1 stars across 52k ratings** on the App Store.
- Built reusable VIPER modules and SwiftUI components and carried them across successive apps, **accelerating development on each new project**.
- Integrated backend REST APIs and validated endpoints with **Postman**; implemented Figma designs as production-ready SwiftUI screens in close collaboration with designers.
- Raised and merged **pull requests** in Git and triggered builds through the team's **CI/CD workflow** as part of the release process.
- Worked in an **11-member frontend team**, collaborating with designers, QA, and backend teams across **3+ departments** to deliver major releases **ahead of schedule**.
- Demoed features to client stakeholders and turned their feedback into release changes.

PERSONAL PROJECTS

- The Yellow Door** – Fashion app concept designed in Figma, covering the main app flow and user research.
App flow: [View design](#) | User research: [View board](#)
- Personal Portfolio Website** – Designed and deployed on Vercel, using AI tools (ChatGPT, Google Flow, Claude) to speed up design and development.

EDUCATION

New Horizon College of Engineering – Bengaluru 2023
Bachelor of Engineering in Computer Science | CGPA: 8.30 / 10

TECHNICAL SKILLS

Languages: Swift, Python, SQL

Frameworks & Architecture: iOS, SwiftUI, VIPER

Development Practices: API Integration & Testing (REST), UI Component Development, Agile/Scrum

Tools: Xcode, Figma, Postman, Jira, MySQL

Version Control & CI/CD: Git, GitHub, GitHub Actions

AI Tools: ChatGPT, Claude, Google Flow

Soft Skills: Cross-functional Collaboration, Client Communication, Stakeholder Demos
